## **Nile Industries**

We have chosen to work in this field for the advantages that are available in fiberglass, including:

- High resistance to chemicals, acids, and pigments is the only solution for chemical and textile plants.
- Lightweight (70% iron weight)
- It does not rust and does not erode it does not require maintenance and printing costs and not manufacturers
- Non-toxic product for water treatment plants and treatment plants
- Anti-sun and therefore not affected by its colors is suitable for coastal areas and desert and open spaces
- It carries loads of up to 2 tons per square meter
- The primary and only iron alternative where all iron negatives are treated

We are in market since 2001 through projects with Hyundai Construction Company (four seasons hotel, MIMAR group (Dreamland) and the Arab Organization for Industrialization (AOI);
